SRINIJA CHALLAGALI

Hyderabad, India | +91 89191 44431 | srinijachallagali@gmail.com
linkedin.com/in/srinijachallagali | github.com/srinijachallagali

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on skills in Java, Python and SQL. Qspiders certified in manual testing, with working knowledge of Agile delivery. Built computer vision and machine learning applications using OpenCV, scikit-learn and TensorFlow. IBM certified in Machine Learning with Python and Infosys certified in Java. Seeking a Software Developer or Software Test Engineer role.

EDUCATION

Bachelor of Technology in Computer Science and Engineering 2022 – 2026
Kalasalingam Academy of Research and Education CGPA: 7.88

Higher Secondary (12th) 2020 – 2022
Narayana Girls Junior College CGPA: 7.33

TECHNICAL SKILLS

Programming: Python, Java, SQL, HTML5, CSS3
Core CS: Object-Oriented Programming (OOP), Data Structures and Algorithms, Debugging, SDLC, Agile and Scrum
Databases: MySQL (joins, subqueries, CRUD operations)
AI and ML: TensorFlow, Keras, scikit-learn, OpenCV, Convolutional Neural Networks (CNN), Random Forest, SVM
Testing: Manual testing, test case design, functional testing, regression testing, defect reporting
Tools: Git, GitHub, Streamlit, technical documentation

PROFESSIONAL TRAINING

Qspiders: Software Testing and Java Jul 2026 – Sep 2026

- **Manual Testing:** test case design, functional and regression testing, bug life cycle and defect reporting.
- **Core Java and SQL:** OOP concepts, collections, exception handling, and database queries using joins and subqueries.
- **Agile Methodologies:** Scrum roles, sprints, user stories, and the full SDLC and STLC workflow.

PROJECTS

Image Tampering Detection (AI Web App)
Python, OpenCV, scikit-learn, Streamlit | *github.com/SrinijaChallagali/Image-Tampering-using-Ai*

- Implemented five OpenCV forensic techniques (copy-move detection, noise analysis, JPEG DCT artifacts, lighting consistency and edge artifacts) that combine into a tampering confidence score and JSON report.
- Extracted 22 image features covering noise, compression, lighting, texture and frequency, and trained Random Forest and SVM classifiers on a dataset of 100 authentic and tampered images.
- Built a Streamlit web app that scores uploaded images on blur, sharpness, noise, compression and color quality to flag likely manipulation.

Face Emotion Detection (Real-Time Deep Learning)
Python, TensorFlow/Keras, OpenCV, CNN

- Trained a 4-block CNN with batch normalization and dropout on 28,800+ face images to classify 7 emotions, reaching about 62% validation accuracy on 7,000+ held-out images.
- Used data augmentation (rotation, horizontal flips) and early stopping to reduce overfitting.
- Ran the model on live webcam video, with OpenCV Haar cascades handling face detection and frame capture.

Flight Booking System (Console Application)
Java, OOP | *github.com/SrinijaChallagali/Flight-Ticket-booking-system-using-Java*

- Developed a menu-driven Java application with user registration and login, flight search by route and dates, and passenger booking.
- Modeled the system with Flight, User and Booking classes, and implemented quicksort to rank search results by price.

CERTIFICATIONS

- Software Testing, Qspiders
- Machine Learning with Python, IBM
- Java Foundation Certification, Infosys Springboard

ACHIEVEMENTS AND TEAMWORK

- **Hack4Purpose 2024 (National Hackathon):** Worked in a 4-person team to build a sustainability-focused prototype within a time-boxed sprint, and handled problem analysis and prototype delivery.
- **She Codes (App Development Hackathon):** Built a user-facing app that addressed a real-world problem.
